Figure 1. (a) A sequence of four stages of a process, each consisting of a horizontal line with several small triangles pointing downwards. The triangles are arranged in a way that suggests a wave or a series of pulses moving from left to right. The first stage has 4 triangles, the second has 5, the third has 6, and the fourth has 7. (b) A diagram showing a sequence of four stages of a process, each consisting of a horizontal line with several small triangles pointing downwards. The triangles are arranged in a way that suggests a wave or a series of pulses moving from left to right. The first stage has 4 triangles, the second has 5, the third has 6, and the fourth has 7.
